# MR. BERT®

May I introduce myself? My name is Mr. Bert. Workwear is not only supposed to be functional and comfortable, it is also meant to make you happy. As an expression of high quality work it is also an ideal vehicle for CI. I am going to accompany you on 62 pages with the new James & Nicholson and myrtle beach Workwear catalogue presenting to you the latest products.

## OEKO-TEX® STANDARD 100

OEKO-TEX® standard 100 is an independent testing and certification system for all processing steps of textiles. It is prerequisite for the certification of textiles according to OEKO-TEX® standard 100 that all the components of an article conform unfailingly to the required criteria – apart from the shell this applies also e.g. to sewing threads, padding, imprints, etc. as well as non-textile accessories, such as buttons, zips, studs, etc.

**The testing for harmful substances comprises:**

- a) substances prohibited by law, b) legalised substances, c) chemicals known to be harmful, however not yet regulated by law, d) parameters for health care. The requirements of testing for harmful substances as a whole go beyond existing national laws.

**Laboratory tests and product classes:**

OEKO-TEX® testing for harmful substances is always defined according to the actual use of the textile. The more intense the skin contact of a product, the more stringent requirements regarding human ecology it has to meet.

**There are four product classes:**

- Class I:** textiles for babies and infants to the age of three (clothing, toys, terry products, etc.)
- Class II:** textiles with skin contact (underwear, bed linen, T-shirts etc.)
- Class III:** textiles without skin contact (jackets, coats, etc.)
- Class IV:** decoration articles (curtains, tablecloths, covering for upholstery, etc.)
