RESPONSIBILITY

SOCIAL COMPLIANCE "BSCI"

As members of the 'BSCI/Business Social Compliance Initiative' we commit ourselves to implementing the BSCI code of conduct as part of our business relations with our manufacturers and thus to improving the working conditions within our supply chain and to producing our textiles fairly. This includes our clear commitment to the employees' right to freedom of assembly, protection against discrimination, and an adequate remuneration, that is, at least the statutory national minimum wage. Another central component is the occupational safety regulations. That is how we guarantee that employees do not work more than 48 hours a week and that the occupational safety regulations of the ILO (International Labour Organisation) are met. Child labour, forced labour or precarious jobs are not tolerated. Several social compliance departments in the countries of production test all the factories thoroughly and make sure that these conditions are met.

www.bsci-intl.org

OEKO-TEX® STANDARD 100

This standard guarantees that textile and non-textile product components pose no threat to health.

www.oeko-tex.com

ADHERENCE TO THE REACH-REGULATIONS

We assure you that when manufacturing our **myrtle beach** products and **JAMES & NICHOLSON** textiles we meet the obligations of the REACH-regulations.

PROTECTION OF THE ENVIRONMENT

All the manufacturing plants of our **myrtle beach** and **JAMES & NICHOLSON** products work on the highest environmental level and pursue the principle of sustainability. For example, all the manufacturing plants dispose of a water purification plant.

QUALITY STANDARD

The merchandise is regularly tested by certified testing institutes in the countries of production regarding the given parameter. Moreover, in cooperation with SGS, Testex, Hohenstein and other renowned institutes the quality is continually controlled.

FUNCTIONS & FEATURES

CAPS FOR PRINTING

Caps with this label are ideal for printing and embroidering. The construction of the caps leaves a lot of space so the cap is easy to decorate, with the logo presented to perfection.

TOPCOOL®

TOPCOOL® polyester fibres perfectly absorb moisture due to their special surface and evacuate it quickly to the outside where it can evaporate. The skin stays comfortably dry and a constant temperature level of the body is maintained.

BREATHABILITY/ PERMEABILITY TO VAPOUR

Functional textiles must have the ability to transport moisture from the skin to the fabric surface as fast as possible. Permeability shows how much steam in grams can evaporate on a surface of 1 m² within 24 hours. The higher this figure, the more breathable the textile is.

LYCRA®

Lykra® allows the fabric both to stretch significantly and to retain its shape. Fabrics and garments containing Lycra offer exceptional fit, comfort, freedom of movement and wrinkle recovery.

WATER COLUMN

The ability to withstand water pressure without moisture penetrating into the material is given by the water column (mm). The minimum standard is a water column of 1,500 mm.

LYCRA® SPORT

Lykra® Sport fabrics are specifically engineered for sporting activities which require a combination of light weight, breathability, muscle support and freedom of movement.

COOLDRY®

Due to the CoolDry® finish moisture is transported to the outside and creates a comfortable feeling. The textiles dry quickly, are breathable and ideal for all activities.

COOLMAX®

COOLMAX®-textiles evacuate humidity very fast to the outside layers of the garment thus supporting a natural temperature regulation of the body.

SOFTSHELL

Softshell with TPU membrane consists of three layers. Due to the microporous TPU membrane as middle layer the material is water-proof, wind-proof and breathable at the same time.
